

## Course Description

# Healthcare Health & Safety Train-the-Trainer Course

### Overview

The requirements thrown on us by health & safety legislation are enormous; this course is designed to cut through the maze of red tape and regulations to give you practical information and advice.

All businesses have a need for general health & safety practices and procedures etc. with the healthcare sector there is considerably more due to the sector requirements themselves. The training from this course can be aimed at managers as well as carers.

The risk assessment is the cornerstone for UK health & safety legislation, this course spends time looking at this facet of health & safety and develops it into a standalone training course for you, which you can deliver alongside the general health & safety course.

### Intended Audience

Trainers and managers in the healthcare sector such as; care homes, nursing homes, residential and respite homes, rehabilitation centres and learning difficulty centres. Also care in the community such as domiciliary agencies.

### Course Details

The course, which runs over two days, You can deliver this course via 5 two/3-4 hour modules – risk assessment training and general healthcare health & safety. These courses are certificated separately for your trainees.

### Assessment

Assessment on this course is done by test paper as well as continuous assessment.

### Course Material

The trainers pack is included which comprises a trainer's manual which is written by trainers for trainers, delegate workbook, CD which includes the PowerPoint presentation that is used through the course and the delegate workbooks, handouts, test papers (with answers!), certificate masters etc.

### Course Format

This is a two day course which starts on the first day with registration at 9:30am and is expected to finish around 4:30pm, with lunch and refreshments (included in the price of an open course).

*This course is also available in-house and direct to carer as either of the modules mentioned. Ask for details!*

### Suggested Follow Up

The healthcare health & safety train-the-trainer course is an excellent starting point for any healthcare manager or healthcare trainer. It also is useful in "filling in the gaps" of other training provider's courses.

### Accreditation

This course is accredited by the UK accreditation body OCN at level 3 for the "train-the-trainer" element, and allows that trainer to issue accredited level 2 certificates to their trainees. Alternatively, the trainer can issue SpringBoard Safety Services certificates free of charge.

### Extended Support

Following the course, if you have any queries, just ask!

*Our support doesn't stop when you go out the door!*

### Special Instructions /Pre-Requisites
